EXPERIENCE

Turkcell

Senior Frontend Developer

June 2020 - Current

I am working on insurance & finance applications of Turkcell used both by customers and dealers. Project techstack is React + Redux in frontend and Java Spring Boot in backend. Scrum methodologies are used in the project workflow.

KoçSistem

Frontend Developer

July 2019 - June 2020

I was responsible from corporate social media project, "Workplace" in KoçSistem (also called "KoçHub" internally for Koç Holding). Frontend technologies used in the project are React, Redux & WebSocket alongside with ASP.Net and Node.js in backend. Agile software development techniques are used in project management with Scrum.
